

## Change in the management of Biovision

Zurich, 29 February 2024

*“Nothing is as constant as change” (Heraclitus)*

After four years of intensive and fruitful collaboration, Executive Director Frank Eyhorn is leaving Biovision by mutual agreement. Our foundation enjoyed continued growth under Frank’s leadership, and under the Executive Committee of Biovision as a whole. We are now in an excellent position, and the foundation is evolving with fresh vigour to meet today’s major challenges on every level.

I would like to thank Frank Eyhorn for his great dedication. I very much regret his departure. At the same time, I am optimistic about the future, safe in the knowledge that I can count on the existing Executive Committee of Biovision and on a highly motivated and very professional team of employees.

I would like to take this opportunity to thank all our partners, members, donors and the entire Biovision staff for their commitment, trust and support.

Together we have achieved a great deal, and I can assure you that despite all the changes that are part of life, Biovision will remain true to its vision, values and goals for sustainable development, on which we are so dependent for our common future.

Sincerely,

Hans Rudolf Herren

President

Biovision – Foundation for Ecological Development
